

A future for businesses that remain essential.

We are preparing to build a group of specialist environmental and industrial service businesses. We welcome owners who wish to discuss succession or long-term cooperation.

01 Separators and drainage

Maintenance, cleaning and emptying of grease and light-liquid separators and related systems.

02 Industrial fluids and cleaning

Metalworking fluid care, system and machine cleaning, and recurring fluid management for manufacturing businesses.

03 Commercial hazardous waste and chemicals

Experienced specialists in waste identification, classification, logistics and documentation for commercial waste streams.

What we are looking for

Established B2B customers, transparent contracts and financials, qualified teams and secured disposal routes. Focus: Germany, initially the Rhine-Main area and neighbouring regions.

How a conversation begins

Get acquainted, agree confidentiality, understand the business, and assess a possible handover and financing case by case. For the first conversation, your service area, region and expectations are enough.
